LRP HV VTEC 1600EC Extra Capacity RX-Pack Futaba 6.0V - 1600mAh - Hump

Receiver Power - These RX- Packs feature high capacity combined with high power rating.

Art. no.: 65862

They allow an extended runtime and offer significantly more power for the servo. The 1600 batteries consist of robust cells with lowest self- discharge rate. Therefore there is no need for a special maintenance.

HV² stands for the revolutionary matching and pushing process which LRP developed to optimise the performance of today's Sub- C batteries. The LRP HV² system boosts the performance of modern NiMH cells!

Features

- Ready- to- use with Futaba connector
- Best value for money
- Exclusive HV² treatment
- High capacity for a long runtime
- RX- Pack for 1/10 scale and 1/8 scale models
- Fast charge enabled
- Silicone- Flex- Wire
- Tested LRP quality, e.g. endurance- tested with over 400 continuous charge and discharge cycles — "Blue is Better"
